Subject: Updates - carbaryl & methomyl (post review), plus final few pieces for posting
[meth.carb draft BEs.signed instructions for commenters 4.4.17.pdf](#)
[NAS Landing Page 03-30-17-updated.docx](#)
[NAS Pilot Document Page for Carbaryl 04-04-17.docx](#)
[NAS Pilot Document Page for Methomyl 04.04.17.docx](#)
[Provisional Models for Endangered Species Pesticide Assessments.docx](#)

Hi Team,

Attached please find the pdf file (*Instructions for Commenting on the Draft Biological Evaluations for Carbaryl and Methomyl*); a document that to be linked in both the carbaryl and methomyl launch pages, as well as the main NAS launch page (as noted in the document). This document is also attached for posting with updates/changes made to the document in track changes.

The provisional models page language is also attached and the associated documents/links are in the H drive (H:\NAS Pilot\CARB+METH Draft BEs\Tools) folder ready for downloading. This page is similar to that posted previously, but those tools that are updated are available for downloading – questions please let me know.

One Attachment – Attachment 4-1 had to be revised, and has been already downloaded to the Attachments folder on the H:NAS drive folder and is ready to be uploaded to both chemicals when ready.

Also, there are a few outstanding chemical specific launch page issues/notes to be addressed and so the word documents of both of those pages are also attached with the edits made/comments in track changes. The main point being that the Attachments are the same for both carbaryl and methomyl and there appears to be some discrepancies in file sizes/and page numbers in either methomyl/carbaryl and it's something that was noted during the review. Also, in the carbaryl page there are some broken links for some of the appendices (those that are affected are noted in the attached document).

If you have any questions or need anything else, please let me know.

Thanks!

Christina

Subject: RE: Carbaryl files in H drive folder, ready for downloading

Hi Delphine and the rest of the Web team,

Attached is the updated landing page word file for both carbaryl and methomyl (updated according to Claire's webformatting recommendations). This way you have what you need for both chemicals; even though the language is the same, but the content below is different... But there are some additional changes captured for each in the document as well. (Document sizes/page #'s in methomyl and file types in carbaryl)...

Also, Great catches in carbaryl for the XLSX Appendices – there were differences in the file types between the different chemicals and I am glad to have had an additional eye to catch those. I checked the links for the chapters for carbaryl – still need to look over the Attachments and Appendices – so far looking good. But will keep you posted.

We will have an update for the models page and NAS landing page coming shortly as well as a heads up. Plus the instructions for commenters that is being mentioned.

Thanks again!

Christina

Subject: RE: Carbaryl files in H drive folder, ready for downloading

Hi Christina,

The demo page is now available at
<https://wcms.epa.gov/node/173621/revisions/511983/view>

I have also attached the landing page Word file with a couple of highlighted entries with different file extensions. I want to make sure I made the appropriate corrections.

Thank you

Delphine

Hi team,

I just wanted to let you know, that the carbaryl files are now in the H drive location, and are ready for downloading when you are ready for them. Since the carbaryl landing page is in progress, once that is complete, the carbaryl files are set and already ready to be downloaded.

Again, any questions or issues, please let me know.

Thank you for all of your help!

Christina

Subject: Attachment files in H drive folder, ready for downloading

Hi team,

I have just added the Attachment files, and these are available on the H drive, ready for downloading. As a reminder, the Attachment files are the same for both methomyl and carbaryl, they have been placed in a separate folder in H:\NAS Pilot\CARB+METH Draft BEs.

We are hoping to send carbaryl a little later on.

Any questions or issues, please let me know.

Thank you,

Christina
